

Dear Sirs,I work in the oil and gas industry off-shore. I work on drilling rigs in the Gulf of Mexico. Generally we are out of touch with the worldout here in the middle of the Gulf particularly with the weather, which is of some concern for us, particularly durring hurricane season. I rely on my XM radio to keep me updated on the weather. I pay for this service and don't think that the National Association of Broadcasters should dictate what I may or may not listen to. So, in regards to the NAB's petition 04-160, I urge you to reject it and support XM radio to provide this vital information to it's listeners.

Sincerly,
George M. Lang Jr.
